Charleston, WV 25301

RE: Case Number: 09-0871-T-PC, Transfer of Verizon's local exchange and long distance business in West Virginia to Frontier Communications

Dear Executive Secretary Squire,

I have serious concerns about the proposed deal to sell Verizon's landlines to a small Connecticut company called Frontier Communications.

This sale is a disaster waiting to happen. Similar Verizon deals in Hawaii and the northern New England states have resulted in bankruptcy for the purchasing company, lost jobs, unmet broadband promises and poor service.

This deal will pad the pockets of Wall Street executives while leaving West Virginians behind.

I sincerely doubt Frontier will be able to service the entire state during emergencies like damaging winds and snow storms knocking down lines. And of course -- if and when this deal goes through -- how will Frontier be able to invest in broadband technology when they will become buried in \$3.3 billion of debt from this deal?

Please make sure that West Virginia doesn't get left behind with a second rate telecommunications infrastructure.

I strongly urge the Public Service Commission to reject this proposed sale. Our economic future depends on it!

Sincerely,

STEVEN SENTER

For West Virginia to be limited for the foreseeable future to only 1 megabyte on Internet service is pathetic. It's a joke and one of many things about WV that make the rest of the country laugh at us. The proposed merger of Verizon and Frontier will not change this and in fact has no apparent advantage for WV customers. The merger subject West Virginians to yet another of the many monopolies here in the state.

Sincerely,

  
Catherine V. Pardee

Dear Senator Unger,

I've been keeping track of the recent developments with the proposed deal to transfer Verizon's landlines to a small Connecticut company called Frontier Communications.

I have grave concerns about this deal and hope you will write the Public Service Commission to express your concerns as well.

This deal will pad the pockets of Wall Street executives while leaving West Virginians behind.

It's a disaster waiting to happen. Similar Verizon deals have resulted in bankruptcy for the purchasing company, lost jobs, unmet broadband promises and poor service.

I encourage you to check out  
<http://www.verizonfrontierdealwv.org> to get all of the background information you need.

I want to -- and you should too -- know if Frontier will be able to service the entire state during emergencies like damaging winds knocking down lines. And of course -- if and when this deal goes through -- how will Frontier be able to invest in broadband technology when they will become buried in debt from the deal?

I strongly urge you to use the power of your voice and express my (and your) concerns to the Public Service Commission. Because ultimately someone will have to be held responsible if this deal goes through and communities across West Virginia suffer.

Dear Senator Unger,

I've been keeping track of the recent developments with the proposed deal to transfer Verizon's landlines to Frontier in West Virginia. We have Frontier service, and it is deficient; we would prefer to have Verizon remain available to us and to link our land line service with Verizon Wireless. Therefore, I have grave concerns about this deal and hope you will write the Public Service Commission to express your concerns as well.

This deal will pad the pockets of Wall Street executives while leaving West Virginians behind.

It's a disaster waiting to happen. Similar Verizon deals have resulted in bankruptcy for the purchasing company, lost jobs, unmet broadband promises and poor service.

I encourage you to check out  
<http://www.verizonfrontierdealwv.org> to get all of the background information you need.

I want to -- and you should too -- know if Frontier will be able to service the entire state during emergencies like damaging winds knocking down lines. And of course -- if and when this deal goes through -- how will Frontier be able to invest in broadband technology when they will become buried in debt from the deal?

I strongly urge you to use the power of your voice and express my (and your) concerns to the Public Service Commission. Because ultimately someone will have to be held responsible if this deal goes through and communities across West Virginia suffer.

Sincerely,  
Thomas Moore

Subject: Who benefits from the verizon Frontier Deal?

Senator John Unger

State Capitol - Building 1

1900 Kanawha Boulevard East, Room 216-W

Charleston, WV 25305-1209

Dear Senator Unger,

I've been keeping track of the recent developments with the proposed deal to transfer Verizon's landlines to a small Connecticut company called Frontier Communications.

I have grave concerns about this deal and hope you will write the Public Service Commission to express your concerns as well.

This deal will pad the pockets of Wall Street executives while leaving West Virginians behind.

It's a disaster waiting to happen. Similar Verizon deals have resulted in bankruptcy for the purchasing company, lost jobs, unmet broadband promises and poor service.

I encourage you to check out

<http://www.verizonfrontierdealwv.org> to get all of the background information you need.

I want to -- and you should too -- know if Frontier will be able to service the entire state during emergencies like damaging winds knocking down lines. And of course -- if and when this deal goes through -- how will Frontier be able to invest in broadband technology when they will become buried in debt from the deal?

I strongly urge you to use the power of your voice and express my (and your) concerns to the Public Service Commission. Because ultimately someone will have to be held responsible if this deal goes through and communities across West Virginia suffer.

Sincerely,

Kim Miner

94 Buck Fever Trail

Harpers Ferry, WV 25425
